- *Solar battery and mains power recharge units supplied as standard .*

We have very positive feedback relating to the installation and use of the Pool and Spa Access Hoist. This product can help people who have severe disabilities, aged swimmers and those who have minor mobility problems.

Using the control pendant, the hoist is positioned to the appropriate height for transfer onto the bevel seat. Pivot the seat over the pool for the person to be lowered in. The seat is lowered into the pool until it is at the correct depth for the user to swim of.

Lift the person from the water using the control pendant up button.
